## Experience

My journey into product design started about eight months ago after taking an online UX/UI design bootcamp. During this time, I learned the fundamentals of user research, wireframing, prototyping and usability testing. I immediately fell in love with the process of creating intuitive user-centered designs. I recently worked on redesigning the furniture app, getting inspiration from dribbble as part of a class project. My role was to conduct user research, create user personas, design wireframes and prototypes. I focused on simplifying the navigation and improving mobile responsiveness to make the ordering process easier for users on the go. Through these projects, I've developed proficiency in design tools like Figma. One of the challenges I faced early on was understanding how to design for different screen sizes. After some trial and error, I got more comfortable with responsive design principles. In a team project, I worked closely with a developer to build a prototype for an e-commerce app. This experience improved my communication skills. I've become proficient in tools like Figma for wireframing and prototyping. Each project I work on reinforces my love for design and the impact it can have on improving user experiences. I'm excited to continue building my skills and eventually contribute to larger projects that make a meaningful difference for users.

## About Me

I've always been passionate about problem-solving and creativity. "I'm currently building my skills in Figma and have taken several online courses on UX/UI design to better understand user-centered design principles." I enjoy tackling real-world problems and figuring out how design can offer practical solutions. It's exciting to turn research and insights into tangible, user-friendly products. Skilled in User Research, wireframing, prototyping and responsive web design using tools like Figma. Passionate about developing user-centered designs that drive business success and elevate brand identity.

## Design Skills

- User Interface Design (UI)
- User Experience Design (UX)
- User Research and Testing
- Wireframing
- Rapid Prototyping

ED

## Education

OND. in Industrial Maintenance Engineering  
Yaba College of Technology, Yaba, Lagos  
2020-2023

LA

## Language

English (Native)

RE

## reference

Available Upon Request

## Tools

- Figma software
- sketch softwere
- Webflow softwere

## Certification

- User Interface Design: Principles, Prototyping, Practices | Coursera
- Product Design (UI UX): Design thinking, User interface and Experience design, Typography, Information architecture and Figma | terra
